COMPANY

# Introduction

The ABZIYAN MARJAN NOUR BOUSHEHR company was registered in 1997, and since 2010, it has been active in the aquaculture industry, specifically in shrimp and fish manufacturing. The company manufactures and exports various types of shrimp and fish, with a capacity of 8,000 tons. Over the past 13 years of activity, it has become one of the largest companies in the manufacturing and export of shrimp and various fish species in the region.

The company has played a significant role in the development and export of marine products, particularly shrimp and various types of fish. The company is currently in the process of expanding its production lines, aiming to increase its capacity to approximately 12,000 tons per year in the coming years. ABZIYAN MARJAN NOUR BOUSHEHR has implemented an integrated system based on international standards for food safety and hygiene in seafood manufacturing and production.

The company processes shrimp and various types of fish, from the stages of receiving raw materials to manufacturing and packaging, ensuring that its products meet global quality standards.

The company's production facility uses state-of-the-art machinery to manufacture and package shrimp and various types of fish. The facility is equipped with the latest technologies for processing, freezing, and packaging marine products, meeting both domestic and international standards.

Currently, ABZIYAN MARJAN NOUR BOUSHEHR is involved in developing the aquaculture and shrimp manufacturing industries on both national and international scales. The company exports seafood products to the European Union, Russia, China, and other countries around the world.

# Features And Advantages

## Specialized Team

Utilizing a young and expert workforce in the aquaculture industry, along with experienced individuals in the field of aquaculture, for farming and manufacturing high-quality and healthy marine products

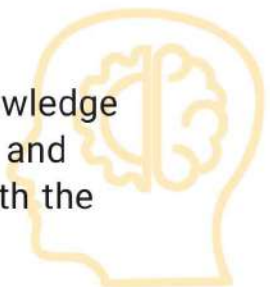

## Quality and Health

Manufacturing hygienic and high-quality marine products by experienced experts in the aquaculture industry, along with quantitative and qualitative control in the shrimp and various fish manufacturing lines.

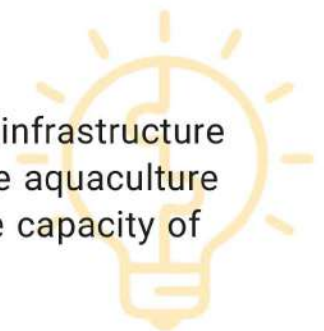

## Knowledge and Experience

Combining aquaculture expertise with up-to-date knowledge in the global aquaculture industry to improve shrimp and fish farming and manufacturing processes, in line with the global marine products market

## Innovation and Technology

Developing shrimp and various fish manufacturing infrastructure using cutting-edge technology and innovation in the aquaculture industry to enhance the quantitative and qualitative capacity of marine products

# Our Services

Freezing and cold storage of aquatic products and seafood

Sale and export of various aquatic species and seafood

Supplying feed for various aquatic species

Manufacturing and packaging of various aquatic products

Contractual production of aquatic products

Development of value chains for aquaculture

Establishment and development of innovation factories and aquaculture incubators

Investment in the field of aquaculture

# Top Exporter of 2021

In line with the defined goals in the field of expanding the export of seafood products, our company ranked second in shrimp exports in 2013. In addition to shrimp farming within the country, the company succeeded in being named the Top Exporter of 2021. The company's products have been exported to countries such as Russia, China, Vietnam, Malaysia, Oman, the UAE, France, Spain, and the UK. This achievement reflects the company's main motto: constant attention to managers, staff, customer respect, and consumers' satisfaction.

The establishment of a quality control unit and obtaining EEC (European Economic Community) approval under numbers 913 for exporting to Russia and China, as well as interacting with customers with high ethical standards, are among the major goals of our company. The ultimate goal is to effectively increase the presence of the company's products in seafood markets, promoting a culture of seafood consumption in the country. From production to export, the company aims to create an integrated chain of seafood products.
